

Beamsplitter Penta Prism

By adding a wedge and with partial reflective coating on surface S1, it can be used as Beamsplitter, which we named as Beamsplitter Penta Prism. Transmission/ Reflection (T/R) ratio of 20/80, 50/50 or others for Beamsplitter Penta Prism is available upon request.

Specification:

Material.....BK7 grade A optical glass

Dimension Tolerance..... $\pm 0.2\text{mm}$

90°,180° Deviation Tolerance.....see table

Flatness.....inclined surface: $\lambda/8$,other: $\lambda/4$ @632.8nm

Reflectivity..... $R>95\%$ @630~680nm

Surface Quality.....60-40 scratch and dig

Beamsplitter Ratio.....T/R:20/80 $\pm 5\%$ @630-680nm

Chamfer..... $<0.5\text{mm}\times 45^\circ$

Coating:

①Entrance & Exit Surfaces: AR coating, $R_{avg}<0.5\%$ @630~680nm

②Reflecting Surface: Enhanced Aluminum with black paint, $R_{avg}>85\%$ @630~680nm

P/N	size(Axh)	deviation
20301	6×5.8	<60"
20302	6×5.8	<30"
